Symphony-iQ
for Collegiate Athletics

Cleaner Air. Healthier Athletes.
Smarter Facilities.

The Challenge in Athletic Spaces

- High occupant density
- Elevated heat and moisture
- Constant equipment movement
- Increase risk of airborne and surface-level contaminants

Traditional air systems were never designed to protect athletes in these environments.

The Symphony-iQ Advantage

Symphony-iQ is a plug-and-play environmental intelligence system designed for high-use athletic environments, delivering active air and surface purification while continuously monitoring conditions that impact athlete health and facility performance.

Designed for Ease - From Install to Daily Use

Fast, Non-Disruptive Installation

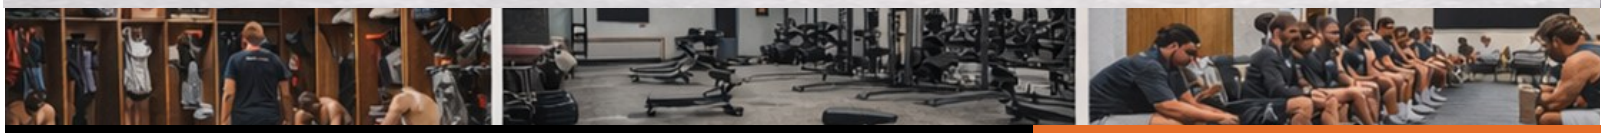
- No ductwork or major modifications
- Ideal for existing & new spaces

Built for Athletic Environments

- Actively purifies air and surfaces
- Reduces odors & contaminants

Simple, Hands-Off Operation

- Always-on autonomous operation
- No staff intervention needed
- Works continuously during training & recovery



Protect athlete health and availability.
Enhance facilities without disruptive capital projects
