Symphony-iQ
for Collegiate Athletics

Cleaner Air. Healthier Athletes.
Smarter Facilities.

The Challenge in Athletic Spaces

- High occupant density
- Elevated heat and moisture
- Constant equipment movement
- Increase risk of airborne and surface-level contaminants

Traditional air systems were never designed to protect athletes in these environments.

The Symphony-iQ Advantage

Athlete Health & Safety: Actively addresses airborne and surface contaminants in high-intensity, high-contact environments.

Performance & Recovery Support: Maintains consistent, optimized environmental conditions that support respiratory health, endurance and recovery.

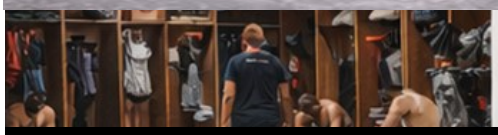
Operational Efficiency: Provides real-time visibility into environmental conditions across training, locker, and recovery spaces.

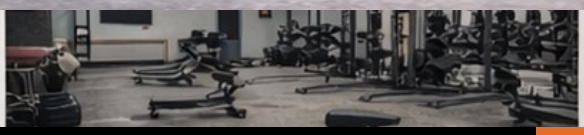
Energy Optimization: Supports smarter HVAC operation in large, high-demand spaces, reducing energy waste while maintaining peak performance conditions.

Recruiting & Program Differentiation: Positions facilities as high-performance, health-focused environments, enhancing athlete experience and competitive recruiting advantage.

Simple, Hands-Off Operation

- Always-on autonomous operation
- No staff intervention needed
- Works continuously during training & recovery





Protect athlete health and availability.
Enhance facilities without disruptive capital projects
