The Challenge in Educational Environments

- Classrooms are densely occupied environments where air quality directly imipacts student health, focus and attendance.
- Schools operate in aging facilities that often struggle to maintain consistent ventilation, temperature and environmental conditions.
- Parents and communities expect transparency around indoor environmental health and safety.
- Facilities teams are under pressure to deliver environments with limited budget and staff.

SYMPHONY-iQ

TEMPERATURE + HUMIDITY AUTOMATION

ACTIVE AIR & SURFACE PURIFICATION

ENVIRONMENTAL MONITORING

REAL-TIME INSIGHTS

The Symphony-iQ Advantage

Symphony-iQ is a plug-and-play Environmental Intelligence engine designed to help schools create healthier learning environments.

It actively purifies air and surfaces, continuously monitors environmental conditions, and provides real-time insights that help administrators and facilities teams maintain safe, comfortable, spaces for students and staff.

- Plug-and-Protect Deployment
- No Construction
- No HVAC Shutdown
- No Classroom Disruption

Design for Ease - From Install to Deployment

Fast Disruption-Free Installation

- Installs easily in classrooms, libraries and common areas
- No duct or major system modifications

Simple, Invisible Operation

- Real-time reporting through unified dashboard
- Continuous operation during the school day and beyond

Let Us Help

Reduce illness transmission

Increase cognitive performance

Control odor & bacteria

Ensure optimal humidity & Temperature

Sanitize equipment, desks and surface areas 24/7/365

Create healthier learning environments without disrupting the school day.
